Professional Summary

MCA Candidate (Expected 2026) from Integral University (CGPA: 8.5) with hands-on experience in Full Stack Web Development, IoT systems, and computer vision applications. Skilled in building secure, production-ready web applications, RESTful APIs, and biometric authentication solutions using PHP, React.js, Node.js, MySQL, MongoDB, OpenCV, and Python.

Technical Skills

Languages	Java, Python, JavaScript, PHP, C/C++
Frontend	React.js, HTML5, CSS3, Bootstrap 5, Tailwind CSS, Responsive Web Design
Backend	PHP 8, Node.js, Express.js, RESTful APIs, JWT Authentication, OAuth 2.0, RBAC
Databases	MySQL (PDO), MongoDB, SQLite
ML / IoT	Computer Vision, OpenCV, Arduino, Sensor Integration
Cloud & APIs	Google Cloud Platform, Google OAuth 2.0, PHPMailer, SMTP
Tools	Git, GitHub, Postman, VS Code, Vercel, InfinityFree, Arduino IDE
Core Concepts	Data Structures & Algorithms, DBMS, OS, Computer Networks, OOP, Agile

Projects

Smart Photo Gallery Management System

2025–2026

Tech Stack: PHP 8, MySQL (PDO), JavaScript, Bootstrap 5, Google OAuth 2.0

- Developed and deployed a secure media management platform with dual authentication — Bcrypt-hashed email/password login and Google OAuth 2.0 SSO.
- Built a 3-tier admin dashboard for dynamic album organization and image uploads, backed by a normalized MySQL schema accessed via PDO.
- Engineered an automated password recovery flow using PHPMailer and Google SMTP; resolved aggressive Gmail spam-filtering on a free hosting domain by re-architecting email body formatting (HTML + Plain text AltBody) to achieve **100% inbox delivery**.
- Debugged a critical server-timezone mismatch causing premature token expiration, fixing it via dynamic timestamp validation logic.
- Configured custom DNS, enforced HTTPS redirection, and implemented CSRF protection and input sanitization to meet Google OAuth redirect URI policies.
- Designed a responsive, mobile-first UI with persistent Dark/Light mode toggle using local storage.

SmartEntry 2FA: Dual-Factor Biometric Attendance System

2025–2026

Tech Stack: Python, OpenCV, Arduino, SQLite, SIM800A GSM

- Engineered a dual-factor biometric system combining facial recognition (OpenCV) and fingerprint scanning (R307 sensor) with **99%+ verification accuracy**.
- Integrated Arduino with R307 fingerprint module and SIM800A GSM for real-time hardware-software communication.
- Automated SMS and email alerts via SMTP protocol, reducing manual attendance tracking effort by **80%**.
- Designed a structured SQLite database to store attendance records with full audit trail support.
- 🔗 [View Source Code](#)

Personal Portfolio Website

2025

Tech Stack: React.js, Tailwind CSS, JavaScript, Vercel

- Designed and deployed a fully responsive portfolio website showcasing projects, skills, and achievements.
- Built modern UI with React.js and Tailwind CSS; deployed on Vercel with GitHub CI/CD integration.

Education

Master of Computer Applications (MCA)

Integral University, Lucknow (NAAC A+)

2024–2026

CGPA: 8.45 / 10.0

Bachelor of Computer Applications (BCA)

Integral University, Lucknow (NAAC A+)

2021–2024

CGPA: 8.5 / 10.0

Certifications

- Google Cloud Computing Foundations Certificate** Google Cloud, 2024
Built foundational proficiency in cloud computing, cloud infrastructure, and cloud-native application development.
- Sigma 9.0: DSA with Java** Apna College, 2025
Covered Arrays, Linked Lists, Trees, Graphs, Dynamic Programming, and problem-solving techniques.
- Sigma 9.0: Full Stack Web Development (MERN Stack)** Apna College, 2026
Covered React.js, Node.js, Express.js, MongoDB, REST APIs, and JWT Authentication.
