Professional Summary

Full Stack Developer (MCA 2026, CGPA: 8.45) with hands-on experience building secure web applications, REST APIs, authentication systems, and database-driven solutions using PHP, MySQL, React.js, and Node.js. Experienced in OAuth 2.0, JWT Authentication, Role-Based Access Control (RBAC), and IoT-based biometric systems. Built and deployed production-ready projects with live users on custom domains.

Technical Skills

Languages	Java, Python, JavaScript, PHP, C/C++
Frontend	React.js, HTML5, CSS3, Bootstrap 5, Tailwind CSS, Responsive Web Design
Backend	PHP 8, Node.js, Express.js, RESTful APIs, JWT Authentication, OAuth 2.0, RBAC
Databases	MySQL (PDO), MongoDB, SQLite
Security	CSRF Protection, Bcrypt Hashing, Rate Limiting, Input Sanitization, XSS Prevention
ML / IoT	Computer Vision, OpenCV, Arduino, Sensor Integration
Cloud & APIs	Google Cloud Platform, Google OAuth 2.0, PHPMailer, SMTP
Tools	Git, GitHub, Postman, VS Code, Vercel, Arduino IDE
Core Concepts	Data Structures and Algorithms, DBMS, OS, Computer Networks, OOP, Agile

Projects

Smart Photo Gallery Management System

2025–2026

Tech Stack: PHP 8, MySQL (PDO), JavaScript, Bootstrap 5, Google OAuth 2.0

🐙 GitHub Repository | 🌐 Live Demo

- Developed and deployed a production-ready media management platform featuring dual authentication (Bcrypt-hashed login, Google OAuth 2.0 SSO) with automatic account provisioning.
- Architected a 3-tier Role-Based Access Control (RBAC) system with isolated permission boundaries to prevent unauthorized administrative modifications and privilege escalation.
- Built a dynamic admin dashboard backed by a normalized MySQL schema, utilizing cascading foreign keys and PDO prepared statements for secure data handling.
- Implemented defense-in-depth security including CSRF token verification, session rate-limiting, externalized .env credentials, and strict .htaccess upload restrictions.
- Engineered automated password recovery via PHPMailer/SMTP with time-bound tokens, and optimized frontend performance using lazy loading and GD-based thumbnail generation.

SmartEntry 2FA: Dual-Factor Biometric Attendance System

2025–2026

Tech Stack: Python, OpenCV, Arduino, SQLite, SIM800A GSM

🐙 GitHub Repository

- Engineered a dual-factor biometric system combining facial recognition (OpenCV) and fingerprint scanning (R307 sensor) with high-accuracy biometric verification.
- Integrated Arduino with R307 fingerprint module and SIM800A GSM for real-time hardware-software communication; automated SMS and email alerts via SMTP, automating attendance recording and notification workflows.
- Designed and optimized a structured SQLite database to store attendance records with complete audit trail support.

Personal Portfolio Website

2025

Tech Stack: React.js, Tailwind CSS, JavaScript, Vercel

🐙 GitHub Repository | 🌐 Live Demo

- Designed and deployed a fully responsive portfolio website showcasing projects, skills, and achievements.
- Built modern UI with React.js and Tailwind CSS; deployed on Vercel with GitHub CI/CD integration.

Education

Master of Computer Applications (MCA)

Integral University, Lucknow (NAAC A+)

2024–2026

CGPA: 8.45 / 10.0

Bachelor of Computer Applications (BCA)

Integral University, Lucknow (NAAC A+)

2021–2024

CGPA: 8.50 / 10.0

Certifications

- Google Cloud Computing Foundations Certificate** Google Cloud, 2024
Built foundational proficiency in cloud computing, cloud infrastructure, and cloud-native application development.
- Sigma 9.0: DSA with Java** Apna College, 2025
Covered Arrays, Linked Lists, Trees, Graphs, Dynamic Programming, and problem-solving techniques.
- Sigma 9.0: Full Stack Web Development (MERN Stack)** Apna College, 2026
Covered React.js, Node.js, Express.js, MongoDB, REST APIs, and JWT Authentication.
